DETAILED ACTION

CLAIMS

Summary

Claims 4 and 8 are the independent claims under consideration in this Office Action.

Claims 5-7 and 9 are the dependent claims under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4,6,8 and 9 are rejected under 35 U.S.C. § 102(b) as being anticipated by Jackson (2,203,220).

Jackson teaches a tufting or "flocking" machine, which forms tufts on a base material. Loops are formed and then the loops are cut to form free end tufts. The machine includes a needle 2 and throat plate and a rotating hook 7 beneath. The hook rotates and engages the needle thread and forms a loop. As the hook further rotates, it cooperates with an ascending/descending blade mounted to a shaft concentric to the hook shaft, which further includes a vane 10a. The hook and blade cooperate or slide against each other at as particular sport for cutting the loop and form a tuft.

ALLOWABLE SUBJECT MATTER

Claims 5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PERTINENT CITATIONS

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sato et al., Schmiedel, Stutznacker and Whitney illustrate cutters for cutting threads.
